DETAILED ACTION

Allowable Subject Matter

The Applicant's amendment to claims 2, 6 and 13 dated 24 October 2005 is acknowledged. Claims 1-21 are allowed. The following is an examiner's statement of reasons for allowance:

The Examiner considered Patent Numbers US 6,619,658 B2 by Shiau and 5,540,423 by Nakano to be the prior art most closely related to the Applicant's claimed invention. Although the conveying apparatus disclosed by said '658 patent incorporates elastic device 96 that biases star-wheel 88 into a media path, it fails to disclose or suggest a loosely fitting wheel on a shaft. Rather, said star-wheel 88 is solidly attached to shaft 95 and said elastic device 96 contacts said shaft 95 in lieu of said star-wheel 88.

Said '423 patent discloses a sheet feed apparatus that incorporates roller units 4 that are attaches to shaft 41. Said roller units 4 are solidly attached to said shaft 41 and are not biased into a media path by means of a resilient member.

Accordingly, neither the '658 or the '423 patents disclose or suggest the configuration of the Applicant's independent claims 1, 11 and 21 that includes a resilient member biasing a disc that is loosely mounted on a shaft into a media path.
